Lumin U1 streamer/renderer basic network hook up requirement

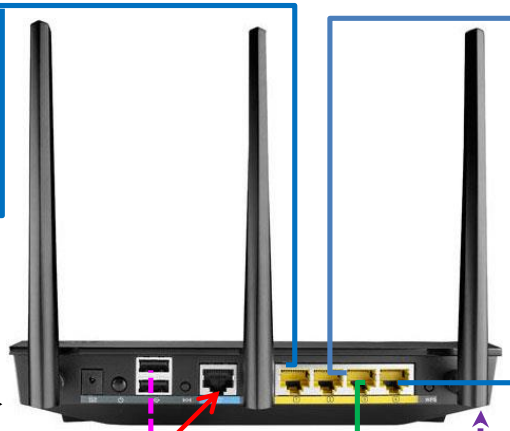
Note: Lumin network inputs (Via Ethernet) won't read drives formatted only for MAC, unless the drive has also been formatted to playback your files on a FAT32 partition.

Optional NAS / FAT32

Optional Network HDD FAT32

Optional Lumin L-1 Music Server 2TB formatted for FAT32

Outside world for direct internet access (Cable modem, etc.)



Wi Fi Router w/direct Internet access

Optional PC for ripping and/or playback from iOS FAT32 partition, or from Windows OS FAT32 partition.

Input for Ethernet cable w/ direct internet access

Optional USB external HDD formatted for FAT32 or NTFS

Router output via Ethernet cable to the Lumin network input. (Ethernet preferred but in some cases a high bandwidth wi fi to Ethernet adapter might be used).

Android tablet, iPhone or iPad (or iPad mini) with the no cost Lumin control application installed

Optional USB flash drive formatted for FAT32 or NTFS

DC power input from Lumin's external, dual mono linear power supply (included with U1).

5 Digital outputs below > USB, Optical, Coaxial RCA & BNC & AES/EBU out to your DAC or Pre-amp/Amp
